# Link Building for Cloud and Data Center Services Company

## Job Overview

Type: Hourly

Workload: As needed - Less than 10 hrs/week

Duration: More than 6 months

Posted: July 20, 2013

Planned Start: Immediately

Visibility: Public

Category: [Sales & Marketing](#)

Sub-Category: [SEO - Search Engine Optimization](#)

## Job Description

We are doing an overall SEO campaign in-house of doing on-page modifications, content development (regular blog posts, content updates, and video), and social media, but we need someone who has experience with and can manage the link building aspects. This job is specifically for manual, white hat link building.

We see this as a continuous effort to continue building links over the long term as there are many phrases we can target if things are going as planned. Our company offers a wide array of services, public cloud, private cloud, managed dedicated servers, data center colocation, managed security, and disaster recovery, meaning there is a lot of work that can be done for link building across all of these product lines.

The methods used must be white hat and no spamming of any kind will be tolerated. The links must follow strict standards of professionalism and only use proper and approved phrases and grammar. A regular report must be provided of the links created, with the specific URL the link appears at, to assure our standards are being met. It is very important for us to maintain the highly professional reputation of our company throughout the entire process.

## Skills Required

link-building seo

### Preferred Qualifications

Feedback Score: At least 4.00  
English Level: Fluent in written, good verbal skills
